

# Basic Overview of the Controller Music Lab

## Purpose

1. To go over the controller and the options of the HS Music Lab reviewing the basics.

## Procedure

1. Below is a picture of the Controller that the teacher will use to manage the students and to be able to push out to the students what the teacher is playing.  
(Please note that the controller will not power on if the network box in the switch box on the wall.)

- 1.) These buttons will be used to select the individual computer, this button will be used in conjunction with button number **2** (the bank button) to go through the list to select the other computers (computers 9-11) when not wanting to use button number **6** to select all of the computers.
- 2.) Use this button to navigate through the computers to select with the help from the LED above the button.
- 3.) These faders will be used to control the volume of the sounds going through the headphones depending on the options selected.
- 4.) The teacher will use these buttons to select which sounds from the teachers machine will be sent out to the selected students.
- 5.) The Pair button can be used to select the student PC's in groups for example, if pair is selected when the teacher presses workstation 1, it will also automatically select workstation 2, and the same thing with deselection.
- 6.) This button will be used to select all of student workstations easily without having to individually press each button for the student computers..
