

SAYRE AREA SCHOOL DISTRICT TECHNOLOGY TIPS

CUSTOMIZING THE NAVIGATION BAR

Purpose

This tip is to show how to add or remove links to the navigation bar on the Sayre website.

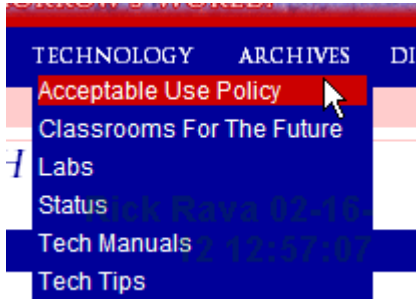

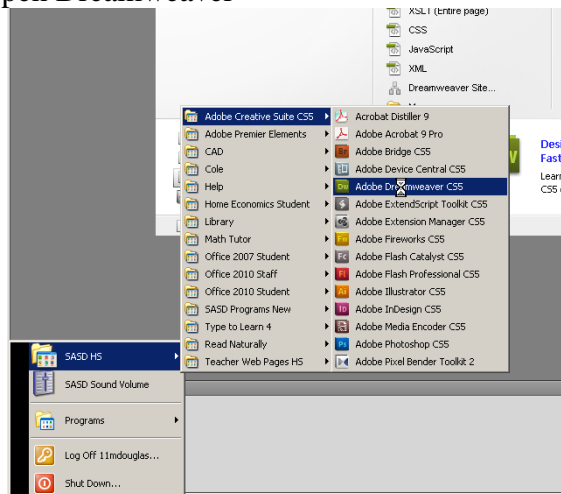

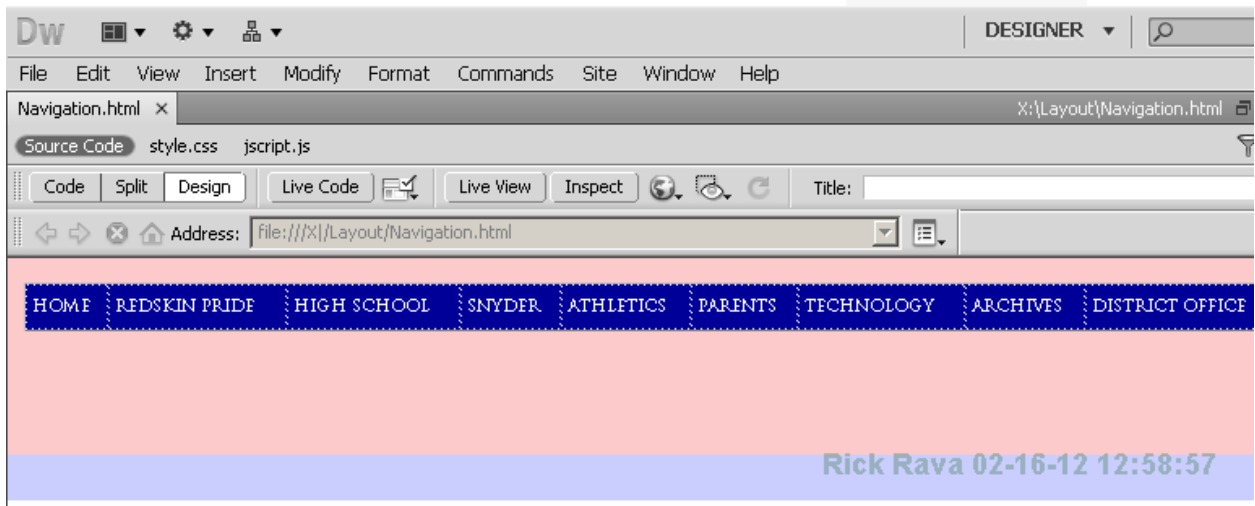

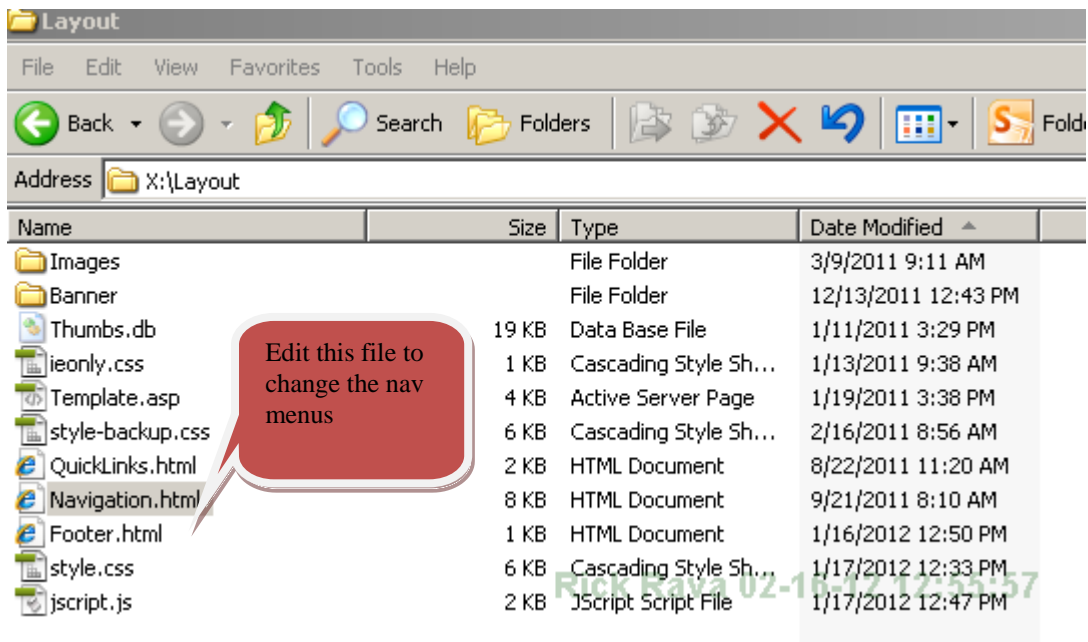

Figure 1 Sample navigation menu

Open navigation file

First, open Dreamweaver

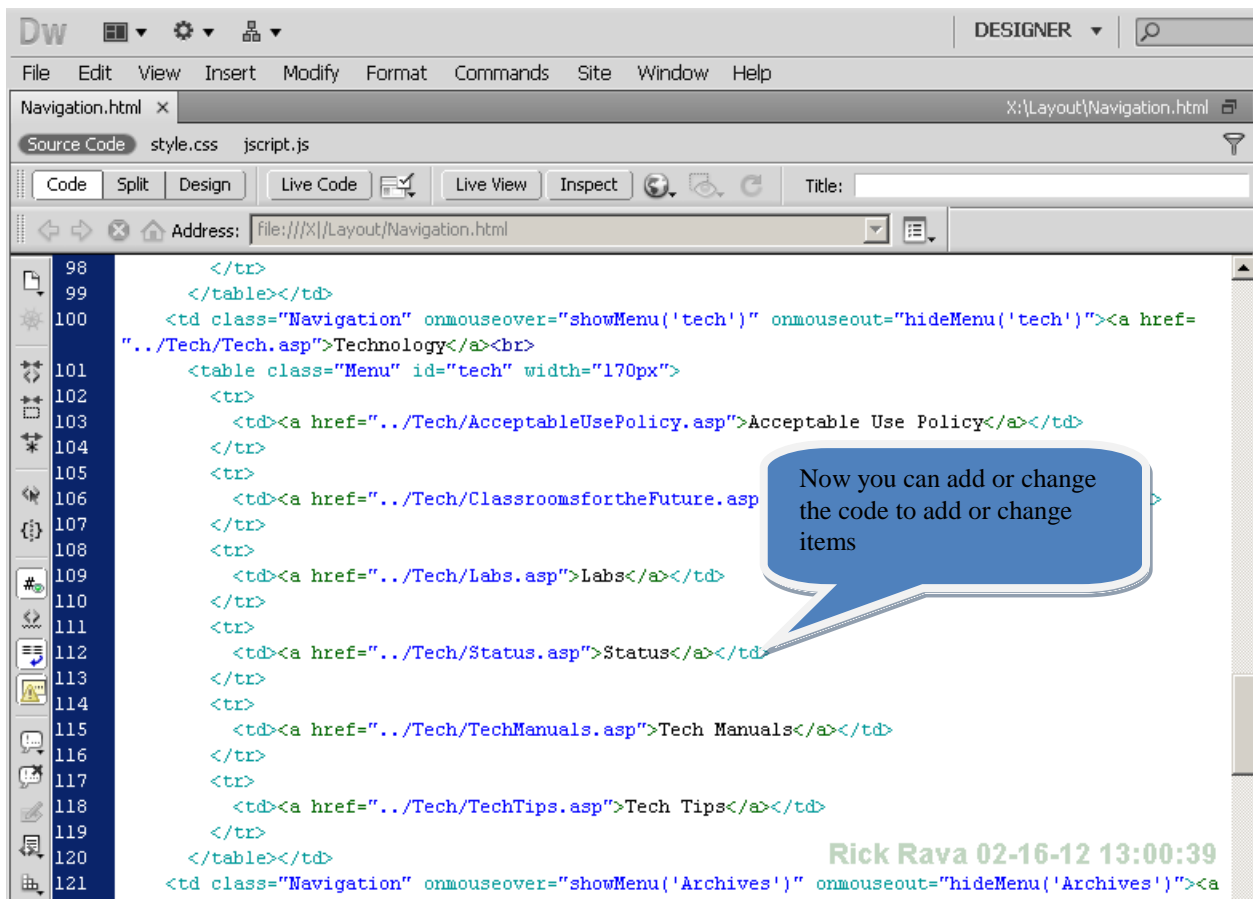

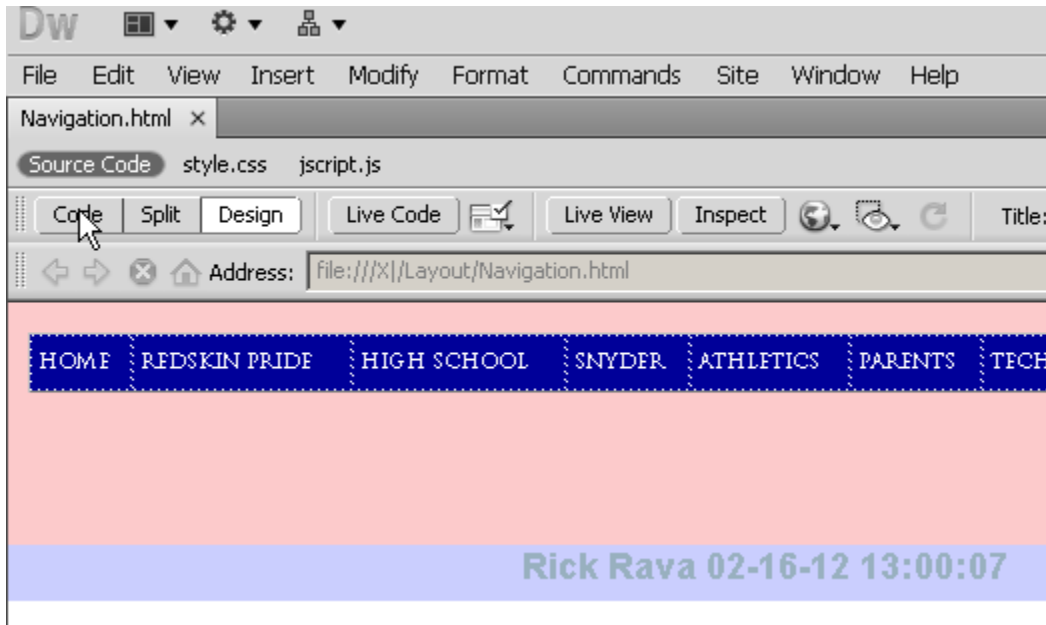

Now, you need to open Navigation.html under the Layout folder.

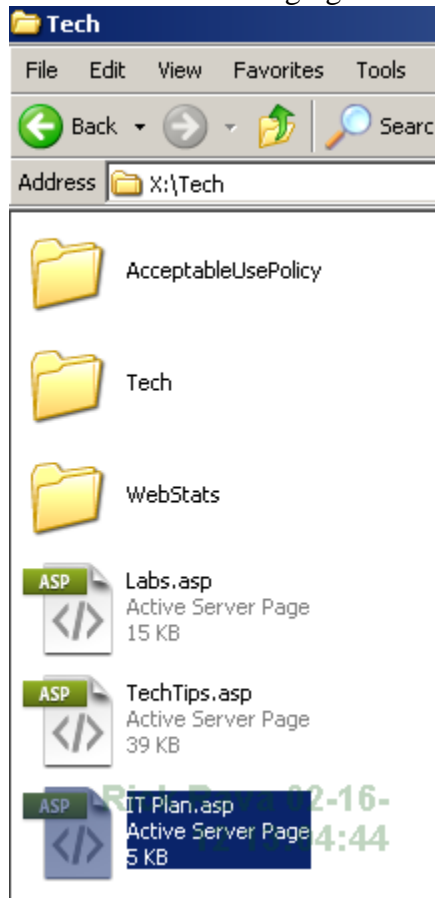

Now go to the code

It's all in the code. You need to open the code section of the page.

In this case I am changing one of the links to go to the IT Plan page

```
</tr>
<tr>
  <td><a href="../../../Tech/IT Plan.asp">IT Plan</a></td>
</tr>
<tr>
  <td><a href="../../../Tech/TechTips.asp">Tech Tips</a></td>
</tr>
.....
```

Then save your change

Now refresh your page and test

Navigation bar with links: SNYDER, ATHLETICS, PARENTS, TECHNOLOGY, ARCHIVES, DISTRICT OF

- Acceptable Use Policy
- Classrooms For The Future
- Labs
- Status
- IT Plans** (highlighted)
- Tech Tips

Click on the following links to review Sayre School District's IT Plans:

Current Plan Rick Rava 02-16-12 13:06:50

[SASD Fiscal Year 2011 - 2012 IT Plan](#) (current plan being implemented)

Re-ordering the Links

Ok – so you are looking at the links and you notice it is not in alphabetical order, now you need to reorder the code

```
100 <td class="Navigation" onmouseover="showMenu('tech')" onmouseout="hideMenu('tech')"><a href=
101 "../Tech/Tech.asp">Technology</a><br>
102 <table class="Menu" id="tech" width="170px">
103 <tr>
104 <td><a href="../Tech/AcceptableUsePolicy.asp">Acceptable Use Policy</a></td>
105 </tr>
106 <tr>
107 <td><a href="../Tech/ClassroomsfortheFuture.asp">Classrooms For The Future</a></td>
108 </tr>
109 <tr>
110 <td><a href="../Tech/IT Plan.asp">IT Plan</a></td>
111 </tr>
112 <tr>
113 <td><a href="../Tech/IT Plan.asp">IT Plan</a></td>
114 </tr>
115 <tr>
116 <td><a href="../Tech/Labs.asp">Labs</a></td>
117 </tr>
118 <tr>
119 <td><a href="../Tech/TechManuals.asp">Tech Manuals</a></td>
120 </tr>
121 <tr>
122 <td><a href="../Tech/TechTips.asp">Tech Tips</a></td>
123 </tr>
124 <tr>
125 <td><a href="../Tech/Web Site Statistics.asp">Web Site Statistics</a></td>
126 </tr>
```

Now save and test
