

# SAYRE AREA SCHOOL DISTRICT TECHNOLOGY TIPS

## MS ACCESS 2013 ENABLE SECURITY FOR MACROS

### Purpose

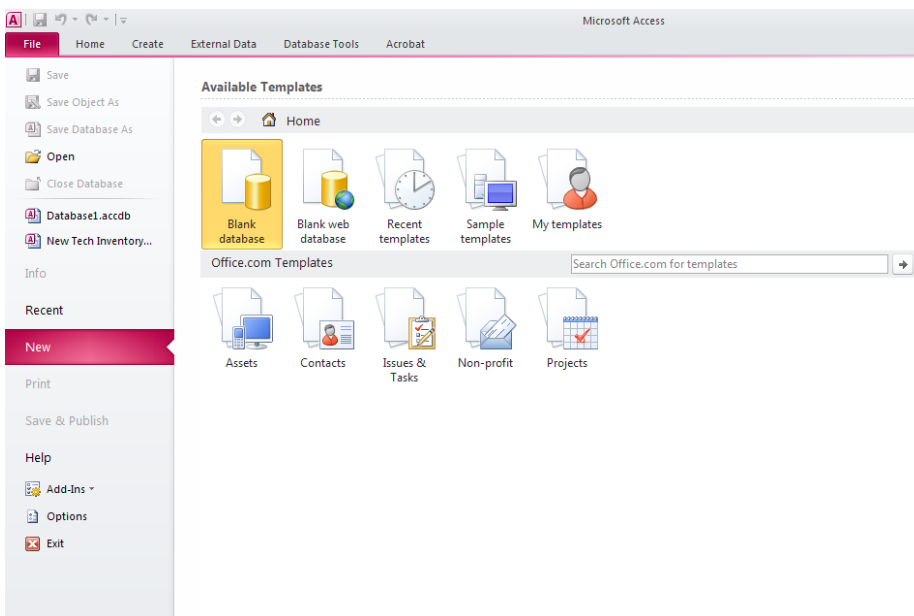

Access 2013 does have some security issues that commonly makes using databases a little more difficult. This handout shows how to make the Access 2013 security work for all databases (this does reduce the security).

The above screen shows the Security Warning for the database.

### How to Enable Security

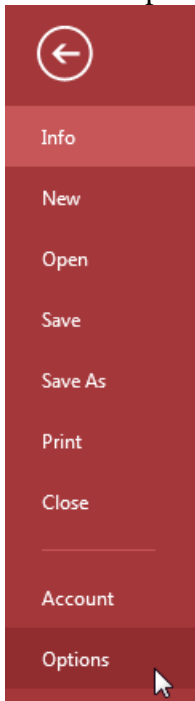

Start up Access 2013

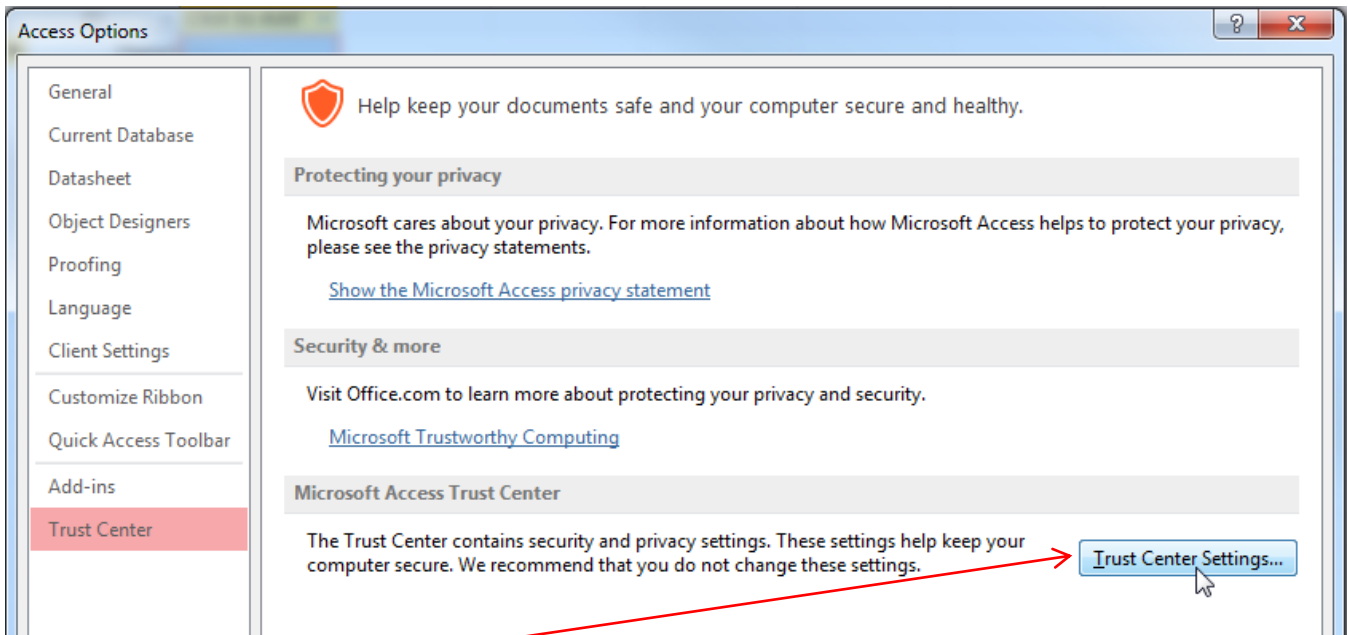

Click on File

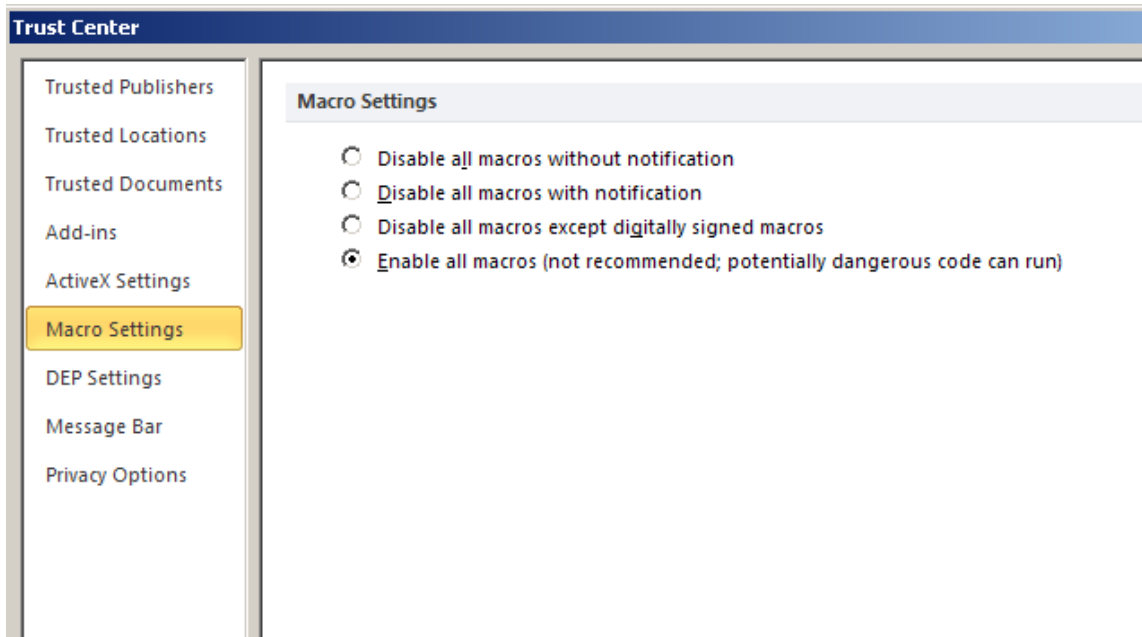

Click on Options

Click on Trust Center

Click on Trust Center Settings

Click on Macro Settings

Select Enable all macros

Click OK

Click OK
