

SAYRE AREA SCHOOL DISTRICT TECHNOLOGY TIPS

BLACK WINDOWS SCREEN ON STARTUP

Purpose

To explain what it is happening when you receive the following screen when your SASD computer is powered on:

Explanation

- When you see the black Windows screen above, the antivirus program is performing a ThirtySeven4 Windows Native Boot scan.
- In most cases when you see the screen above, the process will only take a few minutes.
- The startup scan occurs automatically if the antivirus program suspects that there is a virus on the computer.
