SAYRE AREA SCHOOL DISTRICT TECHNOLOGY TIPS
# HOW TO KNOW IF THIRTYSEVEN4 IS INSTALLED (VERSION 15)

Purpose

Thirtyseven4 is the SASD Antivirus Program.

The purpose of this document is to explain how you can tell if Thirtyseven4 is installed on your SASD computer.

Install Check

There will be a blue "T" in this area if you have the Thirtyseven4 antivirus installed (ex.)

ThirtySever4 Correctly installed

If you move your mouse over the "T" you will see the following sample:

System is secure
Thirtyseven4 EPS 15.00
29 February 2016
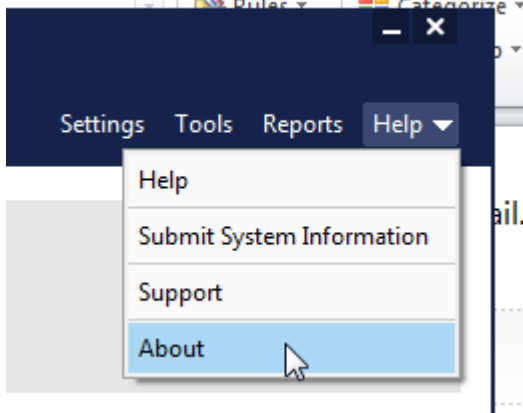

10:13 AM
3/3/2016

Version Check

The current version is easy to check – just double click the T in your system tray – the following screen will appear:

Now click on Help – then About

Current Verison

Optional (Manual Updating of Signatures)

If the "T" is black then the antivirus program needs to be updated on your computer.
*Please note that Thirtyseven4 updates automatically and this does not need to be done.
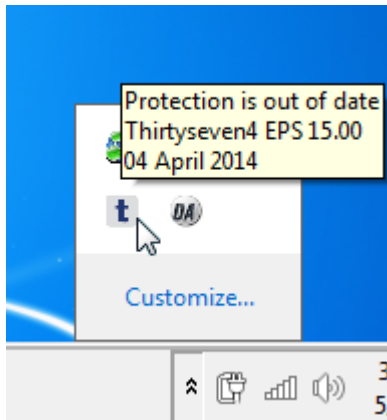

In this case, please do the following:
Right click the black "T" and select Update Now

Once upgraded, the "T" should be blue and you should be able to see the date (ex.)
