

SAYRE AREA SCHOOL DISTRICT TECHNOLOGY TIPS

CREATING AND USING PERSONAL EMAIL GROUPS

Purpose

This handout describes how to create your own Personal Email Groups.

When should I create my own Personal Email Group?

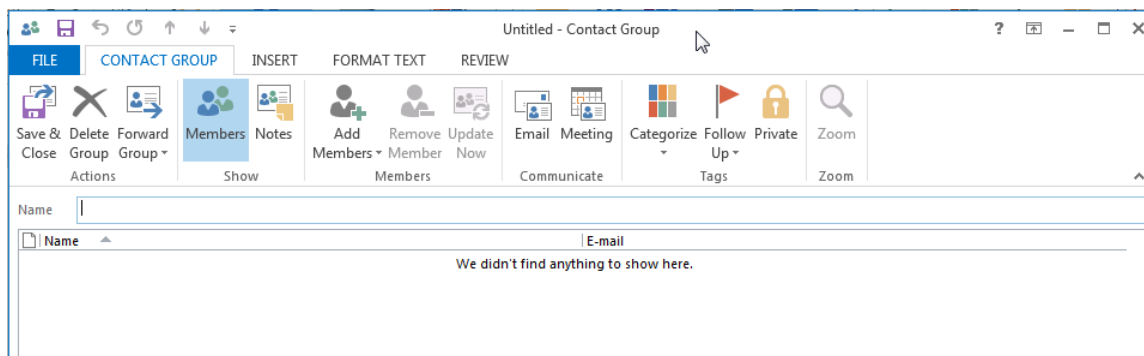

There are many cases when you need to send an email to a group of people – a personal email group should be a group that only you need to send to. If multiple people need to send to this group, then the group should be made on the SASD Exchange Server (just email the Tech Department).

How do I create a Personal Distribution Group?

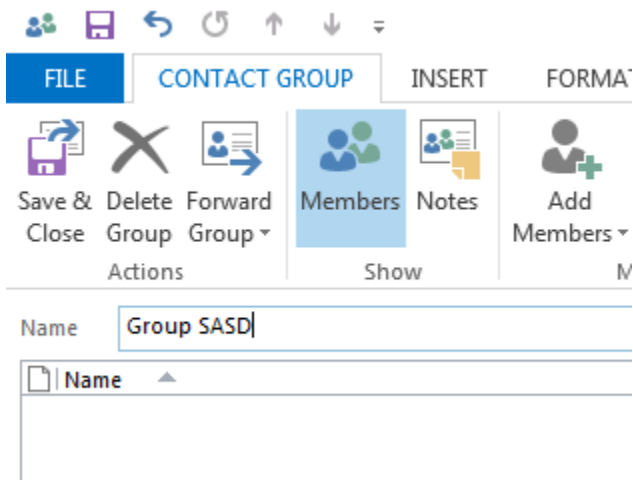

Start up MS Outlook on your PC.

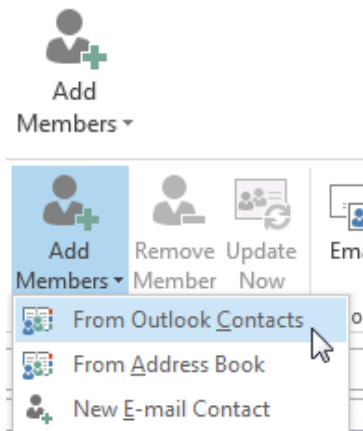

Click on New Contact Group

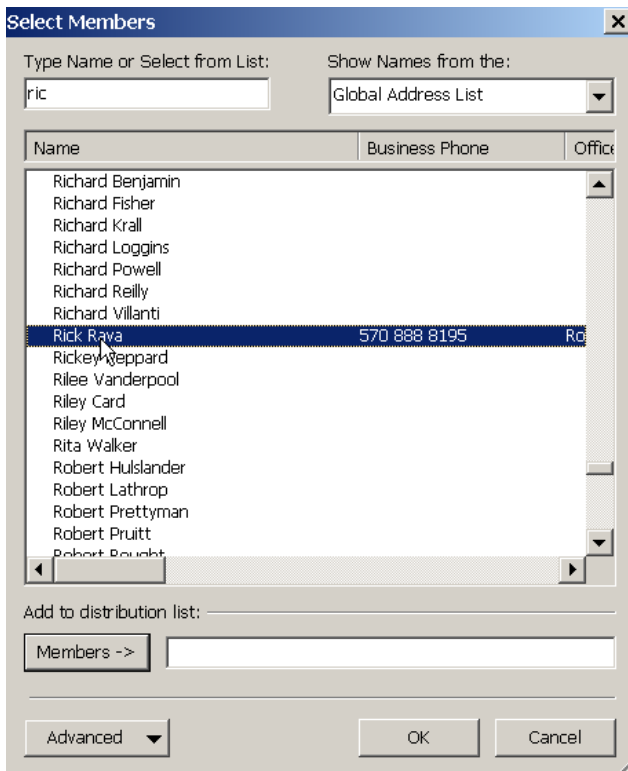

Enter the desired name (I recommend starting your group name with the word “Group”)

Now just add the members to the Personal Contact Group

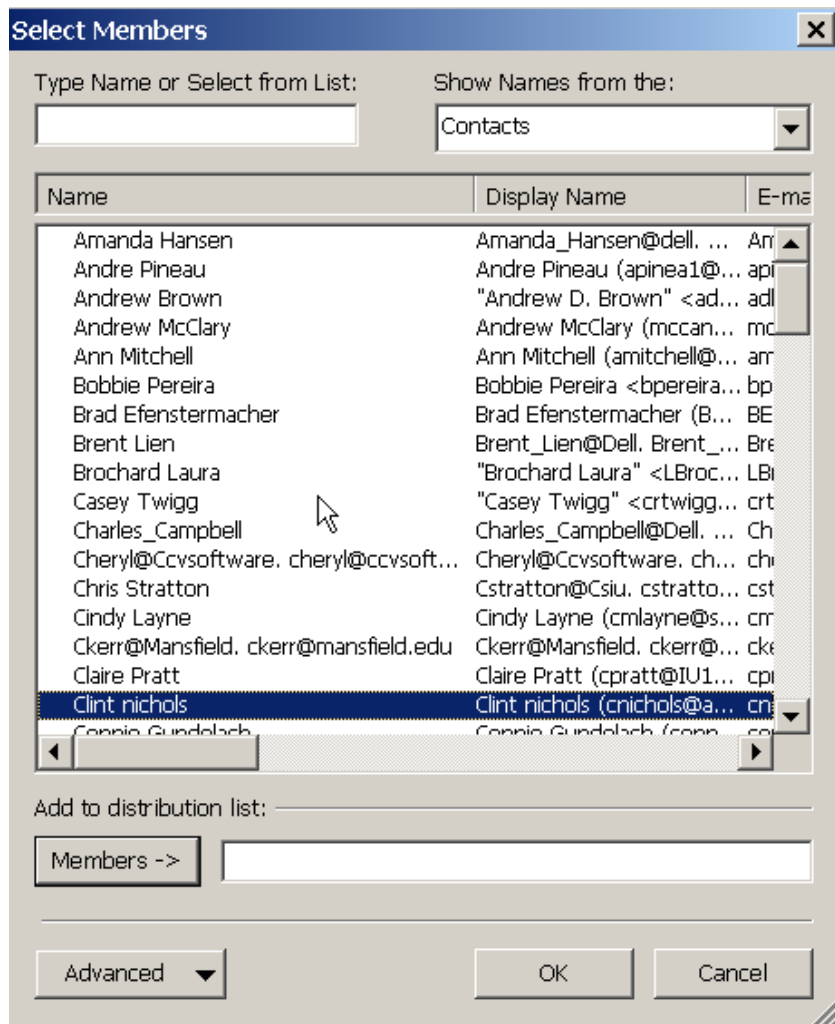

If the member is already in the SASD address book, just click on Select Members

Highlight the person and click on the Members button – then click on OK

If you need to add someone from your Personal Contacts Address Book, just click on Select Members

Navigate and select the desired person and click on the Members button

How do I send to an Email Personal Distribution Group?

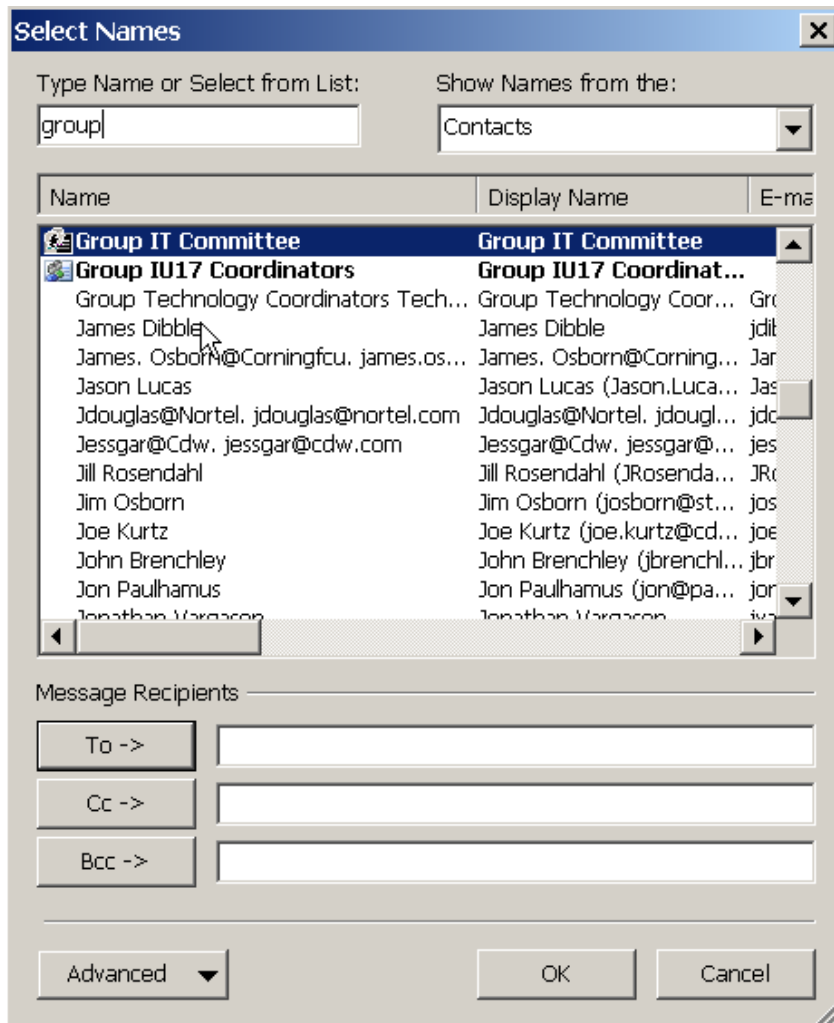

New
Email

Start up MS Outlook on your PC. Click new email:

See the following example:

Click on the To button

Select your Contacts address book

Type in the word group in the “type from name or select from list” field

Highlight the desired group and click on the To button

Click on OK
